

Admission to Integrated Bachelor's and Master's Program in Science-2018

IACS is launching a five year Integrated Bachelor's and Master's Program in Science for highly motivated students who have passed (10+2) level in science stream. The objective of this program is to provide high-quality education, research, and hands-on training in science. Through this program, undergraduate training will be boosted with modern research exposure in all major Schools of science. The first four semesters (two years) of the program will comprise foundational courses in Physics, Chemistry, Mathematics and Biological Sciences, the third and fourth year will focus on the chosen science subjects as majors, and the fifth year will focus on a research project.
