"Coping With Sexual Harassment at Work Place"

Workplace Sexual Harassment is considered a stressful situation because it is appraised by victims as taxing their resources and threatening their well-being (Schneider, Swan, & Fitzgerald, 1997).

What's not always clear, even to experts on the issue, is precisely what to advise those who experience it.

Following the above course, let's talk about how WSH can be dealt with as WSH does act as an obstacle in the victim's overall functioning and has the potential to render the victim fall short of coping mechanisms.

All female faculty, staff and students are hereby invited to attend the talk and share their perspectives on Today, 28th Dec 2022 at CV RAMAN HALL from 04:00 PM to 05:00 PM.

Speaker : Ms Navnita Bose (Psychological Counselor, IACS)

Registrar
