DIAMOND JUBILEE CELEBRATION 2025

About us :

Mental agony and professional compulsion have been coexisting since ages and remain dominant as emerging challenges to personal and social stability. With an aim in encouraging a pursuit of professional excellence, nurturing arts, sports, cultural activities and outreach initiatives have been prioritised significantly and generously to harmonise the rhythm of life.

At Indian Association for the Cultivation of Science, Kolkata, Science Association Club serves as a dynamic platform for faculty members, scientists, fellows and staff members. SAC fosters the bridging of diverse cross sections of professionals within the Institution by presenting multidimensional events in performing arts, fine arts, games and culture. Individuals engage in exchanging opinions and enjoying events. Consequential togetherness beyond usual stress of discharging duties supports overcoming various professional challenges. SAC believes in enriching and strengthening the values of cooperative coexistence and trustworthiness.

After years of dedication and immense effort, SAC has stepped into its Diamond Jubilee Year in 2025. A diverse array of activities and programs across various genres has been planned and proposed for the year-long celebration. Let us join together to commemorate this landmark event. SAC is delighted to extend a heartfelt invitation to everyone in this remarkable journey.
